

AccountsIQ

Give your business the edge

With smarter cloud accounting software
Ideal for fast-growing and group companies

Bridging the gap between entry-level and ERP systems

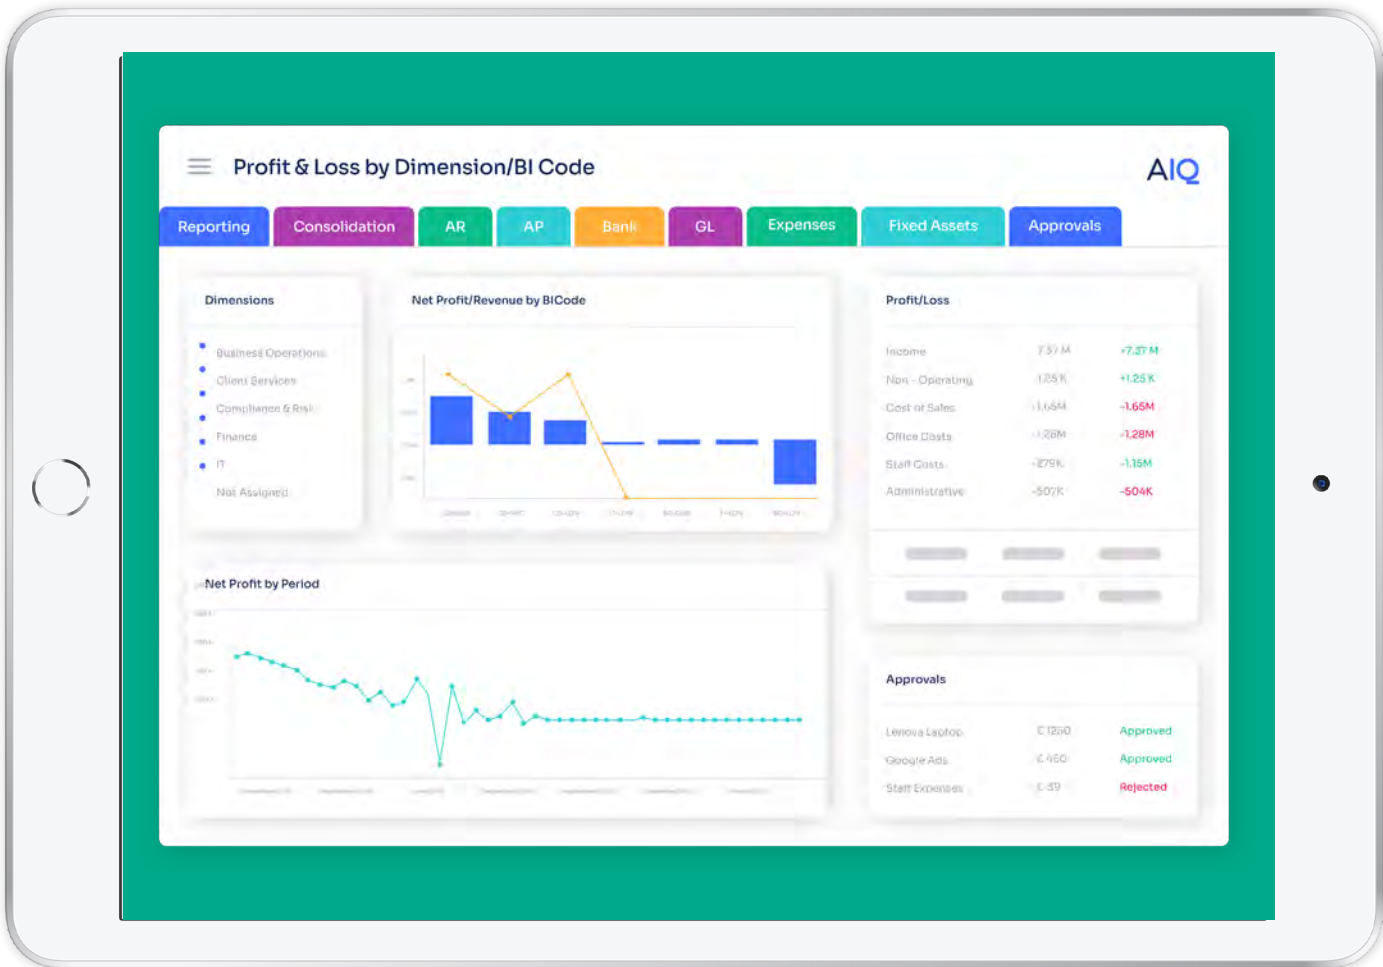

AccountsIQ is one platform for all your accounting, consolidation and business intelligence, delivered on our innovative, secure cloud technology. With innovative accounting automation tools, it will help you complete tasks with ease and deliver accurate insights right across your organisation.

All of this from one application and in real-time.

There’s a huge choice of accounting systems on the market. Starter cloud platforms, such as Xero and QuickBooks, can meet the straightforward finance needs of freelancers and startups. Corporate level systems, such as NetSuite, are hugely powerful but come with a price tag and project complexity to match

that excludes most ambitious and growing SMEs.

If your business falls between these two extremes, or you’re looking to move away from a legacy system, AccountsIQ’s core financials address the gap.

AccountsIQ’s integrated, cloud-based accounting platform is ideal for mid-market companies

See how AccountsIQ’s scalable cloud accounting software gives forward-thinking finance teams the systems and data to inform evidence-based decisions across their organisation.

Automate all data capture

Using our Accounts Payable automation and brand new (AP inbox), you can automate your data entry to digitise the bookkeeping process and scan your receipts and documents

Collaborate more easily

Our cloud platform and mobile app make it easier to share numbers, review budgets and grant approvals – all through one collaborative accounting system.

Automate reconciliation

With live bank feeds built in, you can automate and reconcile bank transactions every day, keeping your numbers up-to-date.

Integrate with other systems

Our application programming interface (API for accounting) takes the hassle out of sharing data, allowing instant integrations with other solutions.

Consolidate group accounts

Our consolidation feature removes the need for tedious workarounds and spreadsheets and offers consolidation and reporting with a few clicks.

Provide tailored reporting

Our reporting features enable advanced analytics, consolidated reporting, custom dashboard and drilled down business intelligence (BI).

Join the cloud accounting revolution

AccountsIQ has been a game-changer for 4,000 companies across the globe. We're aimed at mid-size companies and we specialise in helping fast-growing and group companies in sectors such as financial services, private equity, renewable energy, technology and not-for-profit.

The continuous consolidation engine at the heart of AccountsIQ is really slick. It enables even the most complex of organisations to keep track of all their entities in real-time, and all in one place. This gives finance teams all the information and functionality they need to capture, analyse, distribute for approval, review and make payment.

Grown-up accounting for fast-growing businesses

AccountsIQ offers a robust accounting solution that quickly adapts and scales to the changing needs of fast-growing businesses. If you have ambitious growth plans and envisage the need to add new entities, perhaps in international markets, AccountsIQ can meet your needs, now and in the future.

Ideal for investment companies and multicurrency accounting

Wealth Managers and Private Equity groups also find AccountsIQ ideal for managing the accounting needs of diverse portfolios spanning property, Joint Ventures and SPVs. With AccountsIQ, they have a single, flexible platform to manage their investee companies, from start-up through scale-up to mature entity and exit strategy. With consistent reporting and continuous consolidation, fund managers, clients and partners can have confidence in the valuation of the investments they are monitoring.

“I looked at Sage and Xero, but they didn't have the functionality we needed to flow with our CRM system. I also looked at ERP solutions, but they came with a hefty price-tag. AccountsIQ gives enhanced functionality at a good price and it's quicker and easier to implement and manage than an ERP.”

Customer Success is in our DNA

We want you to have the smartest accounting software to meet your needs. And, we're committed to ensuring that all our customers have the best possible experience using our product.

Our professional onboarding consultants will work with your finance team to get you up and running quickly. Our implementation service includes full, flexible training to meet your needs. Customers can also use our on-demand e-learning platform, AIQ Academy, with over 100 video-based modules when they need to learn about new features.

Just having one person at AccountsIQ dedicated to the onboarding process was absolutely amazing. She helped with all my questions, spent hours with me discussing and resolving issues. She's still there to answer any questions today."

I was looking for a Xero equivalent but more turbo-charged in its ability to do consolidation, meet the requirements of multiple jurisdictions, and handle foreign exchange. AccountsIQ seems to tick more boxes than other systems designed for businesses like ours."

Apera Asset Management gets "turbo-charged" accounting from AccountsIQ

Solving the accounting needs of a multi-entity, international business, Rob Shaw, CFO of Apera Asset Management chose to move from Xero to AccountsIQ when consolidation became too cumbersome and international jurisdiction requirements became too complex.

"Xero worked really well for us for two years when we needed simple, single entity accounting, but it made international accounting difficult. We didn't have a

need for an Oracle-like system but we had to address multi-jurisdictional needs. AccountsIQ's consolidation software means there is no fiddling around in spreadsheets trying to get things to tie. Working in Excel was not sustainable; before AccountsIQ, we had instances where we were struggling to get these reports right, sometimes until 2 am." — **Rob Shaw, CFO of Apera Asset Management**
